

# BUSINESS & REVENUE MODEL

Project MATRA-X Commercialization Strategy

## MONETIZATION & FINANCIAL FRAMEWORK

### PRIMARY MARKET SEGMENT

Industrial Plants & Multi-Facility Enterprises

### DEPLOYMENT ARCHITECTURE

Enterprise SaaS / On-Prem Hybrid Cloud

## 1. MARKET VALUE PROPOSITION

MATRA-X unifies fragmented material catalogs into a shared inter-plant network, unlocking **₹420 Crore** in stagnant inventory and reducing procurement lead times by **85%**.

FIGURE 1: MATRA-X MULTI-TIER REVENUE ARCHITECTURE

## 2. REVENUE STREAM DESCRIPTIONS

### 1. Enterprise SaaS Licensing

Annual tier-based subscription fees charged per enterprise instance based on total SKU volume and active plants.

### 2. Value Transfer Micro-Fee

A minor fee (0.5% – 1.0%) on the total calculated value of idle parts exchanged between sister facilities.

### 3. Master Data Cleansing Onboarding

One-time fee for AI-assisted legacy catalog cleansing and automated ERP connector setup.

### 4. Defense & Air-Gap SLA

Dedicated maintenance, air-gapped on-premise installation support, and custom safety rule development.

## 3. PRICING TIER FRAMEWORK

| LICENSING TIER     | CAPACITY & SKU SCOPE                     | PRICING STRUCTURE                         |
|--------------------|------------------------------------------|-------------------------------------------|
| Single Plant Unit  | Up to 50,000 SKUs / Single Facility      | Fixed Annual License (₹15L – ₹25L)        |
| Regional Depot Hub | 50,000 – 250,000 SKUs / Regional Network | Annual SaaS + Usage Volume Band           |
| Enterprise Nexus   | 250,000+ SKUs / Multi-Facility Network   | Custom Enterprise License Agreement (ELA) |

#### 4. OPERATIONAL COST DISTRIBUTION & MARGINS

MATRA-X maintains 70–80% operational margins post-deployment due to scalable vector search indexing:

#### 5. GO-TO-MARKET (GTM) ROLLOUT PLAN

| DEPLOYMENT PHASE       | TARGET FACILITIES                     | STRATEGIC KEY DELIVERABLE                                 |
|------------------------|---------------------------------------|-----------------------------------------------------------|
| Phase 1 (Months 1–6)   | Pilot at Primary Plant & Regional Hub | Validate 94.8% AI accuracy & measure lead-time savings.   |
| Phase 2 (Months 7–18)  | Expansion to Sector Enterprises       | Onboard 20 facilities; unlock ₹100+ Cr in stagnant stock. |
| Phase 3 (Months 19–36) | Pan-Industry Enterprise Rollout       | Establish MATRA-X as default standard coding layer.       |

#### 6. FINANCIAL SUSTAINABILITY & CLIENT ROI

Minimal compute costs per added SKU allow MATRA-X to achieve break-even in Year 1, offering client facilities a **10x to 15x return on investment** by avoiding redundant purchasing.
